Impact Fee Overview

What are impact fees?

- One-time fees charged to new development, usually at building permit
- Represent new development's fair share of infrastructure and facility needs
- Not charged to existing residences or businesses

What are impact fees?

- Used to fund facilities needed to serve new development
 - Not for operations and maintenance costs
 - Not for the share of facilities serving existing development

Mitigation Fee Act Findings (Govt. Code §66000 et seq)

- Key findings
 - Need: Development \approx Need for facilities
 - Benefit: Development \approx Use of revenue
 - Rough proportionality: Fee amount \approx development's share of facility costs
- Other findings
 - Purpose of fee
 - Use of fee revenue

Impact Fees – Basic Methodology

1. Estimate existing development and future growth
2. Identify improvement standards
3. Determine new facility needs and costs
4. Allocate share to accommodate growth
5. Calculate fee by allocating costs per unit of new development
